Addressing strategic challenges with interconnected capabilities

We deliver on the promise of The New Intelligence

IHS Markit provides leaders from multiple industries with the perspective and insights they need to make the best choices and stay ahead of their competition.
Effective commodities inventory management is a competitive and a financial edge

Pricing and trading commodities has gotten easier through new technologies, yet managing physical inventory remains cumbersome as it typically relies on email and spreadsheets.
Commodity Tracker leverages leading technologies to process existing vendor documents

<table>

**Process**

**OCR**

Optical Character Recognition (OCR) technology transforms your paper faxes and PDFs into digital data.

**Machine Learning**

Machine learning algorithms identify the structure of the document and extract key data, such as weight and grade, regardless of the vendor format.

**Normalization**

The data is then normalized to account for the myriad of abbreviations, regional spelling differences, and measurement units, to create a consistent dataset.
IHS Markit Commodity Tracker improves efficiency and reduces the risk of holding physical inventory with three modules:

1. Position Tracking and Reconciliation

2. Scheduling and Planning

3. Inventory Optimization
